# NAVAJO SUSTAINABLE AGRICULTURE

## Background

The Navajo Sustainable Agriculture Project (NSA Project) builds on the work and accomplishments of the Native American Producer Success Project (NAPS Project). For more information please visit our website at <https://nsaproject.nmsu.edu>.

## Project Goals

- ❖ Improve the operations, profitability, and sustainability of socially disadvantaged Navajo farmers and ranchers and veteran farmers and ranchers (Navajo SDFR&VFR).
- ❖ Increase Navajo SDFR&VFR knowledge and use of USDA (NRCS, FSA, RD, and RMA) programs and services and other resource providers.
- ❖ Increase the local production and consumption of fresh fruits and vegetables and healthy food by Navajo families and individuals.
